

Posture Policy:

A posture policy is a collection of posture requirements, which are associated with one or more identity groups, and operating systems. Posture Policy defines what is compliant and what is noncompliant about endpoint. This compliance could be based on the version of antispysware or antimalware. Software present on the endpoint and whether the anti-X definitions are up-to-date. Posture Policy, is the configuration of the Posture rules. Posture Policy check what is compliant & what is not compliant within security policy.

Posture Policy

Define the Posture Policy by configuring rules based on operating system and/or other conditions.
