

Enabling USB-Debugging:

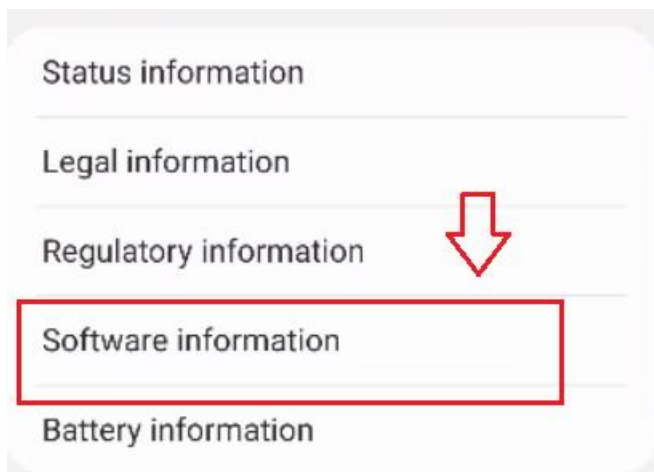

On the Android device, open the **settings**.

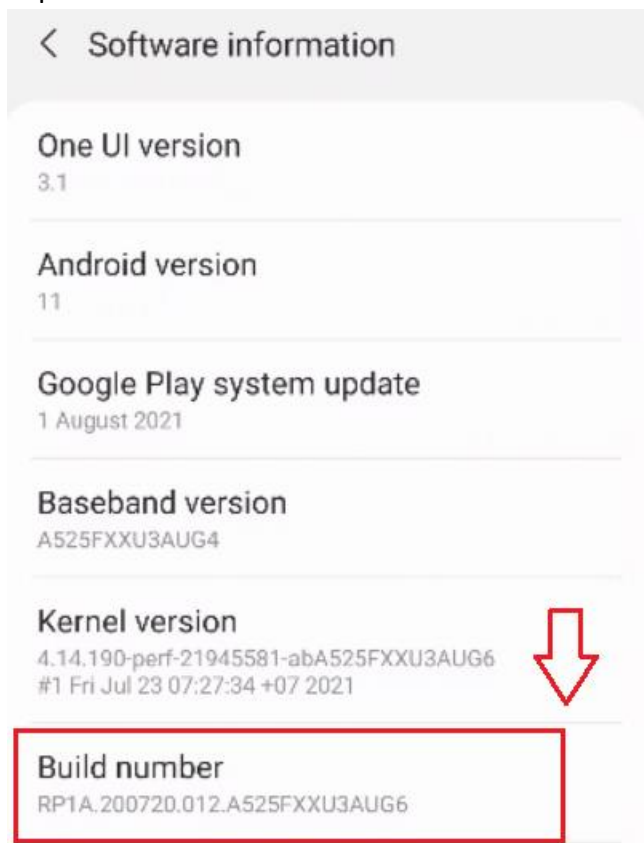

On the device, go to **Settings > About Phone**.

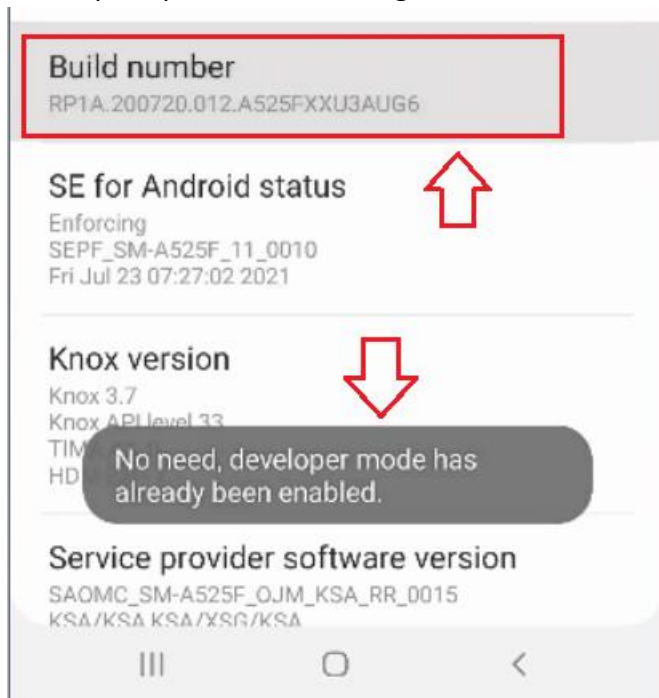

Click on **Software Information**

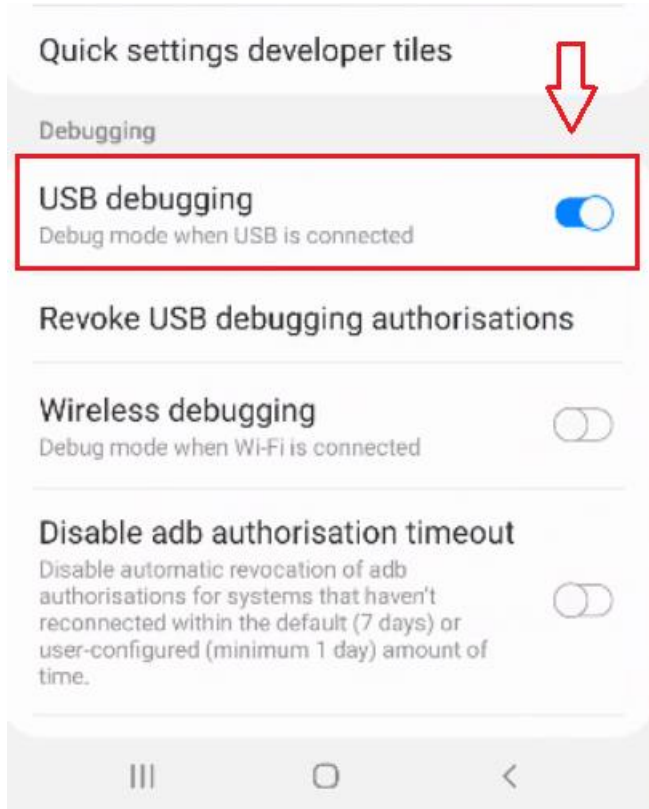

Tap the **Build number** seven times to make **Settings > Developer** options available.

When you click on Build number it shows you popup how many time more require to enable developer option in the setting.

Go back to **setting > Developer** and Then enable the **USB Debugging** option

SCRCPY Application:

Download **SCRCPY** Application from below link to open Android Phone through USB

<https://github.com/Genymobile/scrcpy/releases>
